EP

WHERE PASSION MEETS PRAGMATISM

MECHANICAL ELECTRICAL PLUMBING FIRE PROTECTION

FORM FOLLOWS FUNCTION

There is a common expression in the engineering industry: *"form follows function."* Coined by Louis Sullivan, the "father of modernism" in architecture, its meaning is simple. In order to determine the shape and design of a building, you must first ascertain what it will be used for.

At EP Engineering, we are keenly aware of the necessity of function in the structures we design for our clients. For the EP Engineering team of experts, aesthetics are as important as the practicality of the engineering systems we design.

EP Engineering specializes in the design of mechanical, electrical, plumbing, and fire protection systems for commercial, residential, retail, institutional, and cultural facilities. We are a full service MEP engineering firm that will handle all your project needs. Our range of services include:

- HVAC
- Electrical and Fire Alarm
- Plumbing
- Fire Protection
- Telecommunications
- Lighting Design
- Energy Solutions
- Condition Assessment and Reports

To find out how we can help with your next project, give us a call at 201.798.8931.

WE'RE A FULL SERVICE MEP ENGINEERING FIRM

THE EP ENGINEERING ADVANTAGE

Unparalleled Customer Service

At EP Engineering, we're fully committed to offering you prompt, courteous service and the highest level of professional expertise. Using a proactive approach, we're right there in the field, testing and modifying, putting in the meticulous care that means a job done right the first time. Our customers know this and it's why they return to work with us again and again!

Superb Project Management

At EP Engineering, we take pride in our unique ability to manage and coordinate the various experts who will be developing your project. From planning to procurement, supplying to subcontracting, we maintain an ongoing dialogue with every member of your engineering design and construction team.

Cost-Effective Solutions

Work with EP Engineering, and come to expect practical solutions that speak to your individual needs and financial requirements. Rest easy knowing that your team consists of experienced and dedicated professionals who will drive the results you want without driving up the budget.

Speed and Efficiency

Keeping costs down and productivity up is the name of our game plan. Count on EP Engineering to take a proactive approach to your project, managing the small but critical details up front.

Environmentally Aware

A member of the Green Building Council, EP Engineering is expanding to the area of LEED (Leadership in Energy & Environmental Design). Talk to us about your environmental concerns including water reduction use, energy conservation and efficient air handling systems.

Our Services

Below, we've outlined in detail some of the many types of projects we can help you develop. If you have something in mind that you don't see here, contact us and let us know your needs.
